This design serves the following objectives:

1. Double elimination
2. Players play against as many players as possible in their flight before playing against a competitor more than once.
3. Eliminate byes or reduce as much as possible by assigning matches to a player from another flight, subject to #4.
4. A player from different flight cannot eliminate another player. Therefore, only players with no losses will be assigned matches with players from other flights.
5. Flights are organized by index.
6. Match assignments are assigned within a flight by blind draw.
